VHF Channel Monitored:

VHF channels to be monitored include:

- Channel 16 for the Canadian Coast Guard – Emergency
- Channel 74 for marine traffic in the Fraser River.
- Channel 71 – FRPD Crew(s) Working Channel

Special Requests or Additional Information:

Anchor installed upstream of Pattullo S1 Pier for marine derrick positioning at Pier 6 and 7. Anchor coordinates are as follows: 49 12' 31.6"N, 122 53' 30.9" W.

As marine equipment will be positioned and working around Piers 6 through 10, this area will be restricted to navigation.

Navigation Channel Closures:

South Channel Closure:

Please be advised of the following closure of the CN New Westminster Swing Span **South Channel** to Marine Traffic:

Tuesday January 3 to Saturday January 7: 07:00 to 19:00

This closure is requested to provide safe distance between the works noted and marine traffic during the new Protection Pier Works. FRPD marine equipment may encroach the South Channel during the closure, but will be moved clear of the channel otherwise. The North Channel and the Domestic Channel will be available for marine traffic during this time.

Reference is made to the attached staging drawing for the time period noted above for the marine scope of work. This is a general depiction of the marine equipment positions during working and non-working hours, and is subject to change based on site conditions.

A full time FRPD assist tug from Catherwood Towing will be on site (resuming January 3rd) to tend construction vessels for the project. The tug will aid vessels going through the navigational channel only in an emergency situation.

NAVWARN – Equipment Positioning January 3 to January 7, 2023
